

Human Reduced glutathione ELISA Kit | GSH elisa kit

Human Reduced glutathione ELISA Kit

CATALOG #
AAA16388

REACTIVITY
Human

PRODUCT SYNONYMS

Reduced glutathione; Human Reduced glutathione ELISA Kit; GSH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of RGLU. No significant cross-reactivity or interference between RGLU and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between RGLU and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GSH elisa kit	Principle of the Assay: RGLU ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-RGLU antibody and an RGLU-HRP conjugate. The assay sample and buffer are incubated together with RGLU-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the RGLU concentration since RGLU from samples and RGLU-HRP conjugate compete for the anti-RGLU antibody binding site. Since the number of sites is limited, as more sites are occupied by RGLU from the sample, fewer sites are left to bind RGLU-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The RGLU concentration in each sample is interpolated from this standard curve. Intended Uses: This RGLU ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human RGLU. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for GSH elisa kit	Signal Transduction

NCBI AND UNIPROT INFORMATION

NCBI GI #	143347058
Molecular Weight	24,129 Da
NCBI Official Full Name	Gsh, partial
UniProt Protein Name	Gsh
UniProt Entry Name	A6YB91_PLADU

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
