

Mouse Anti-Ribosomal RNP Antibody ELISA Kit | RRNP elisa kit

Mouse Anti-Ribosomal RNP Antibody ELISA Kit

CATALOG # AAA16402	REACTIVITY Mouse
------------------------------	----------------------------

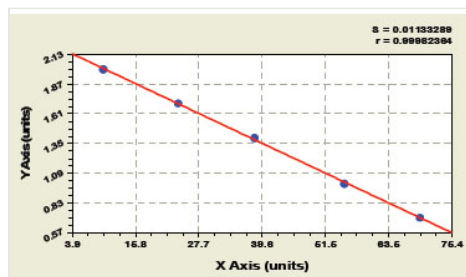

PRODUCT SYNONYMS

Anti-Ribosomal RNP Antibody; Mouse Anti-Ribosomal RNP Antibody ELISA Kit; RRNP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	5-100ng/mL
Sensitivity	1.0ng/mL
Intended Uses	This RRNP-Ab ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse RRNP-Ab. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

Principle of the assay: RRNP-Ab ELISA kit applies the competitive enzyme immunoassay technique utilizing Ribosomal RNP antigen and an RRNP-Ab-HRP conjugate. The assay sample and buffer are incubated together with RRNP-Ab-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the RRNP-Ab concentration since RRNP-Ab from samples and RRNP-Ab-HRP conjugate compete for the Ribosomal RNP antigen binding site. Since the number of sites is limited, as more sites are occupied by RRNP-Ab from the sample, fewer sites are left to bind RRNP-Ab-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The RRNP-Ab concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
