

Rat GROgamma ELISA Kit | GROgamma elisa kit

Rat GROgamma (Growth Regulated Oncogene Gamma) ELISA Kit

CATALOG #
AAA164376

REACTIVITY
Rat

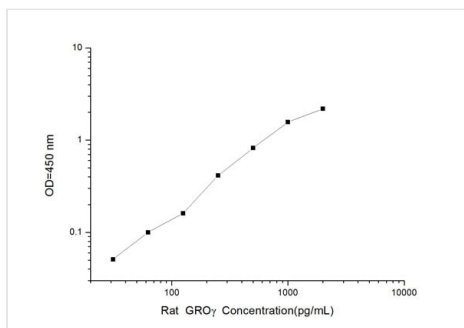

PRODUCT SYNONYMS

GROgamma; Rat GROgamma (Growth Regulated Oncogene Gamma) ELISA Kit; GROgamma elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This kit recognizes natural and recombinant Rat GROgamma. No significant cross-reactivity or interference between Rat GROgamma and analogues was observed.
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	31.25-2000pg/mL
Sensitivity	Min: 18.75pg/mL; Max: 2000pg/mL
Intended Uses	This ELISA kit applies to the in vitro quantitative determination of Rat GROgamma concentrations in serum, plasma and other biological fluids.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for GROgamma elisa kit

Principle of the assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to GROgamma. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for GROgamma and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain GROgamma, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of GROgamma. You can calculate the concentration of GROgamma in the samples by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
