

## Mouse IDUA ELISA Kit | IDUA elisa kit

Mouse IDUA (Alpha-L-iduronidase) ELISA Kit

CATALOG #  
**AAA164525**

REACTIVITY  
**Mouse**

### PRODUCT SYNONYMS

IDUA; Mouse IDUA (Alpha-L-iduronidase) ELISA Kit; IDUA elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                        |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                  |
| Specificity             | This kit recognizes natural and recombinant Mouse IDUA. No significant cross-reactivity or interference between Mouse IDUA and analogues was observed. |
| Sequence Length         | 523                                                                                                                                                    |
| Samples                 | Serum, Plasma, Biological Fluids                                                                                                                       |
| Assay Type              | Sandwich                                                                                                                                               |
| Detection Range         | 0.156-10ng/mL                                                                                                                                          |
| Sensitivity             | Min: 0.094ng/mL; Max: 10ng/mL                                                                                                                          |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                   |

| Related Product Information for IDUA elisa kit | <p>Intended Uses: This ELISA kit applies to the invitro quantitative determination of MouseIDUAconcentrations in serum, plasma and other biological fluids.</p> <p>Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to IDUA. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for IDUAand Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain IDUA, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of IDUA. You can calculate the concentration of IDUAin the samples by comparing the OD of the samples to the standard curve.</p> |
