

Mouse Gzms-A ELISA Kit | Gzms-A elisa kit

Mouse Gzms-A (granzyme A) ELISA Kit

CATALOG #
AAA164595

REACTIVITY
Mouse

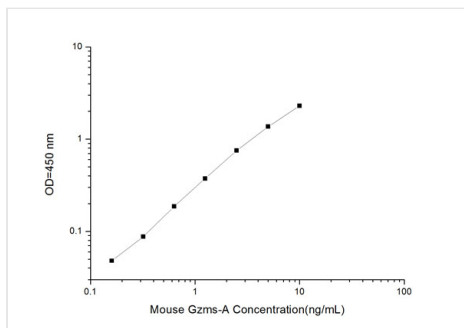

PRODUCT SYNONYMS

Gzms-A; Mouse Gzms-A (granzyme A) ELISA Kit; Gzms-A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mouse Gzms-A. No significant cross-reactivity or interference between Mouse Gzms-A and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Mouse Gzms-A and all the analogues, therefore, cross reaction may still exist.
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	0.156-10ng/mL
Sensitivity	Min: 0.094ng/mL; Max: 10ng/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for Gzms-A elisa kit	Description: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of Gzms-A in Mouse serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse Gzms-A. Standards or samples are added to the appropriate micro ELISA plate wells and bound by the specific antibody. Then a biotinylated detection antibody specific for Mouse Gzms-A and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse Gzms-A, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Mouse Gzms-A. You can calculate the concentration of Mouse Gzms-A in the samples by comparing the OD of the samples to the standard curve.
