

Human IgG3 ELISA Kit | IgG3 elisa kit

Human IgG3 (Immunoglobulin G3) ELISA Kit

CATALOG #
AAA164619

REACTIVITY
Human

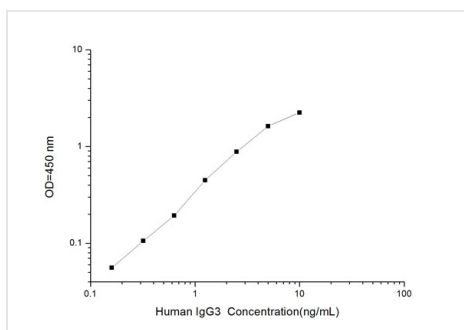

PRODUCT SYNONYMS

IgG3; Human IgG3 (Immunoglobulin G3) ELISA Kit; IgG3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes Human IgG3 in samples. No significant cross-reactivity or interference between Human IgG3 and analogues was observed.
Sequence Length	165
Samples	Serum and plasma
Assay Type	Quantitative Sandwich
Detection Range	31.25-2000ng/mL
Sensitivity	18.75ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human IgG3 were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human IgG3 were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for IgG3 elisa kit	Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human IgG3 concentrations in serum and plasma, please inquire if your samples are other biological fluids. Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been precoated with an antibody specific to Human IgG3. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human IgG3 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human IgG3, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 +/- 2 nm. The OD value is proportional to the concentration of Human IgG3. You can calculate the concentration of Human IgG3 in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	3954895
NCBI Official Full Name	immunoglobulin heavy chain (IgG3), partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
