

## Rabbit PGF ELISA Kit | PGF elisa kit

Rabbit PGF (Placental Growth Factor) ELISA Kit

CATALOG #  
**AAA165017**

REACTIVITY  
**Rabbit**

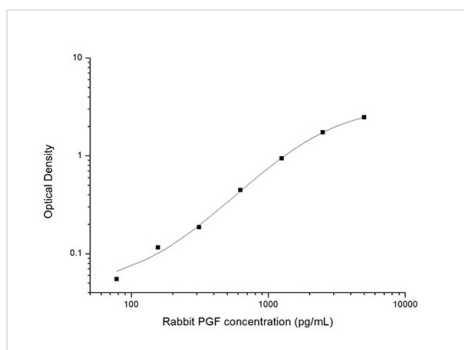

### PRODUCT SYNONYMS

PGF; Rabbit PGF (Placental Growth Factor) ELISA Kit; PGF elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                        |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rabbit                                                                                                                                                 |
| Specificity             | This kit recognizes natural and recombinant Rabbit PGF. No significant cross-reactivity or interference between Rabbit PGF and analogues was observed. |
| Sequence Length         | 149                                                                                                                                                    |
| Samples                 | Serum, Plasma, Biological Fluids                                                                                                                       |
| Assay Type              | Sandwich                                                                                                                                               |
| Detection Range         | 78.125-5000pg/mL                                                                                                                                       |
| Sensitivity             | Min: 46.875pg/mL; Max: 5000pg/mL                                                                                                                       |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                   |

| Related Product Information for PGF elisa kit | <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Rabbit PGF concentrations in serum, plasma and other biological fluids.</p> <p>Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to PGF. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for PGF and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain PGF, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of PGF. You can calculate the concentration of PGF in the samples by comparing the OD of the samples to the standard curve.</p> |
