

Mouse TAT ELISA Kit | TAT elisa kit

Mouse TAT (Thrombin-Antithrombin Complex) ELISA Kit

CATALOG #
AAA165045

REACTIVITY
Mouse

PRODUCT SYNONYMS

TAT; Mouse TAT (Thrombin-Antithrombin Complex) ELISA Kit; TAT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Mouse TAT. No significant cross-reactivity or interference between Mouse TAT and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Mouse TAT and all the analogues, therefore, cross reaction may still exist.
Sequence Length	86
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	15.625-1000pg/mL
Sensitivity	Min: 9.375pg/mL; Max: 1000pg/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for TAT elisa kit	Description: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of TAT in Mouse serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse TAT. Standards or samples are added to the appropriate micro ELISA plate wells and bound by the specific antibody. Then a biotinylated detection antibody specific for Mouse TAT and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse TAT, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Mouse TAT. You can calculate the concentration of Mouse TAT in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	9629358
NCBI GeneID	155871
NCBI Accession #	NP_057853.1
NCBI GenBank Nucleotide #	NC_001802.1
NCBI Official Full Name	Tat
NCBI Official Symbol	tat
NCBI Protein Information	p14; Tat

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
