

Human F13 ELISA Kit | F13 elisa kit

Human F13 (Coagulation Factor XIII) ELISA Kit

CATALOG #
AAA165152

REACTIVITY
Human

PRODUCT SYNONYMS

F13; Human F13 (Coagulation Factor XIII) ELISA Kit; F13 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human F13. No significant cross-reactivity or interference between Human F13 and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Human F13 and all the analogues, therefore, cross reaction may still exist.
Sequence Length	321
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	25-1600pg/mL
Sensitivity	Min: 15pg/mL; Max: 1600pg/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for F13 elisa kit	Description: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of F13 in human serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human F13. Standards or samples are added to the appropriate micro ELISA plate wells and bound by the specific antibody. Then a biotinylated detection antibody specific for Human F13 and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human F13, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Human F13. You can calculate the concentration of Human F13 in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	335709
Molecular Weight	36,436 Da
NCBI Official Full Name	F13
UniProt Protein Name	36 kDa major membrane protein F5
UniProt Gene Name	F13
UniProt Entry Name	F5_VACCP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
