

Human ERbeta ELISA Kit | ERbeta elisa kit

Human ERbeta (Estrogen Receptor Beta) ELISA Kit

CATALOG #
AAA165202

REACTIVITY
Human

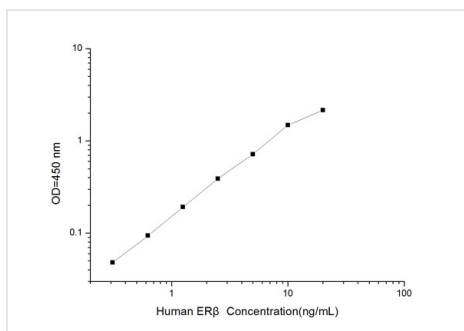

PRODUCT SYNONYMS

ERbeta; Human ERbeta (Estrogen Receptor Beta) ELISA Kit; ERbeta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Human ERbeta. No significant cross-reactivity or interference between Human ERbeta and analogues was observed. Note: Limited by current skills and knowledge, it is impossible for us to complete the cross- reactivity detection between Human ERbeta and all the analogues, therefore, cross reaction may still exist.
Sequence Length	527
Samples	Serum, Plasma, Biological Fluids
Assay Type	Sandwich
Detection Range	0.313-20ng/mL
Sensitivity	Min: 0.188ng/mL; Max: 20ng/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for ERbeta elisa kit	Description: The kit is a sandwich enzyme immunoassay for in vitro quantitative measurement of ERbeta in human serum, plasma and other biological fluids Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human ERbeta. Standards or samples are added to the appropriate micro ELISA plate wells and bound by the specific antibody. Then a biotinylated detection antibody specific for Human ERbeta and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human ERbeta, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Human ERbeta. You can calculate the concentration of Human ERbeta in the samples by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	57619192
NCBI GeneID	443066
NCBI Accession #	NP_001009737.1
NCBI GenBank Nucleotide #	NM_001009737.1
UniProt Accession #	Q9TU15; Q9N0T6
Molecular Weight	36,176 Da
NCBI Official Full Name	estrogen receptor beta
NCBI Official Symbol	ESR2
NCBI Official Synonym Symbols	ERB; ERBETA
NCBI Protein Information	estrogen receptor beta; ER-beta; nuclear receptor subfamily 3 group A member 2; steroid receptor
UniProt Protein Name	Estrogen receptor beta
UniProt Gene Name	ESR2
UniProt Synonym Gene Names	NR3A2; ER-beta
UniProt Entry Name	ESR2_SHEEP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
