

## Mouse TG ELISA Kit | TG elisa kit

Mouse TG (Thyroglobulin) ELISA Kit

CATALOG #  
**AAA165355**

REACTIVITY  
**Mouse**

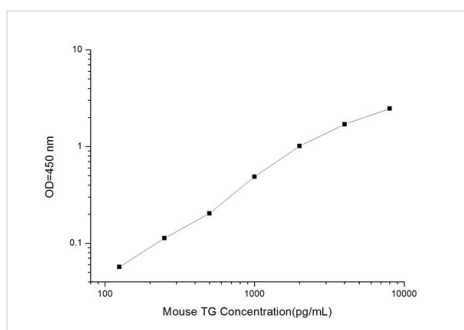

### PRODUCT SYNONYMS

TG; Mouse TG (Thyroglobulin) ELISA Kit; TG elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                         |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                                   |
| Specificity             | This kit recognizes Mouse TG in samples. No significant cross-reactivity or interference between Mouse TG and analogues was observed.                                   |
| Sequence Length         | 2768                                                                                                                                                                    |
| Assay Type              | Quantitative Sandwich                                                                                                                                                   |
| Samples                 | Serum, plasma and other biological fluids                                                                                                                               |
| Detection Range         | 125-8000pg/mL                                                                                                                                                           |
| Sensitivity             | 75pg/mL                                                                                                                                                                 |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Mouse TG were tested 20 times on one plate, respectively.               |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Mouse TG were tested on 3 different plates, 20 replicates in each plate. |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                                    |

| Related Product Information for TG elisa kit | <p>Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse TG. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse TG and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse TG, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Mouse TG. You can calculate the concentration of Mouse TG in the samples by comparing the OD of the samples to the standard curve.</p> <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse TG concentrations in serum, plasma and other biological fluids.</p> |
