

## Human MMP-10 ELISA Kit | MMP-10 elisa kit

Human MMP-10 (Matrix Metalloproteinase 10) ELISA Kit

CATALOG #  
**AAA165539**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

MMP-10; Human MMP-10 (Matrix Metalloproteinase 10) ELISA Kit; MMP-10 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                       |
| Specificity             | This kit recognizes Human MMP-10 in samples. No significant cross-reactivity or interference between Human MMP-10 and analogues was observed.                               |
| Sequence Length         | 569                                                                                                                                                                         |
| Samples                 | Serum, plasma and other biological fluids                                                                                                                                   |
| Assay Type              | Quantitative Sandwich                                                                                                                                                       |
| Detection Range         | 78.13-5000pg/mL                                                                                                                                                             |
| Sensitivity             | 46.88pg/mL                                                                                                                                                                  |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human MMP-10 were tested 20 times on one plate, respectively.               |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human MMP-10 were tested on 3 different plates, 20 replicates in each plate. |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                                        |

| Related Product Information for MMP-10 elisa kit | <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human MMP-10 concentrations in serum, plasma and other biological fluids.</p> <p>Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human MMP-10. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human MMP-10 and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human MMP-10, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of Human MMP-10. You can calculate the concentration of Human MMP-10 in the samples by comparing the OD of the samples to the standard curve.</p> |
