

## Mouse CYPD ELISA Kit | CYPD elisa kit

Mouse CYPD (Cyclophilin D) ELISA Kit

CATALOG #  
**AAA165734**

REACTIVITY  
**Mouse**

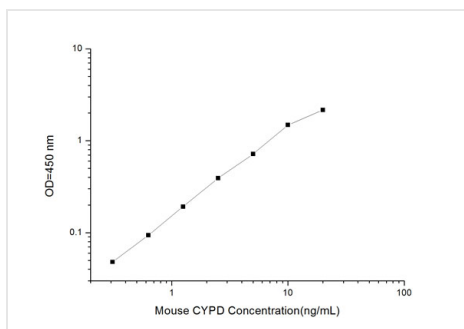

### PRODUCT SYNONYMS

CYPD; Mouse CYPD (Cyclophilin D) ELISA Kit; CYPD elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                        |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Mouse                                                                                                                                                  |
| Specificity             | This kit recognizes natural and recombinant Mouse CYPD. No significant cross-reactivity or interference between Mouse CYPD and analogues was observed. |
| Sequence Length         | 1061                                                                                                                                                   |
| Samples                 | Serum, Plasma, Biological Fluids                                                                                                                       |
| Assay Type              | Sandwich                                                                                                                                               |
| Detection Range         | 0.313-20ng/mL                                                                                                                                          |
| Sensitivity             | Min: 0.188ng/mL; Max: 20ng/mL                                                                                                                          |
| Preparation and Storage | Store at 4 degree C.                                                                                                                                   |

| Related Product Information for CYPD elisa kit | <p>Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse CYPD concentrations in serum, plasma and other biological fluids.</p> <p>Principle of the Assay: This ELISA kit uses Sandwich-ELISA as the method. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to CYPD. Standards or samples are added to the appropriate micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for CYPD and Avidin-Horseradish Peroxidase (HRP) conjugate is added to each micro plate well successively and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain CYPD, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The OD value is proportional to the concentration of CYPD. You can calculate the concentration of CYPD in the samples by comparing the OD of the samples to the standard curve.</p> |
