

Mouse Ang-II ELISA Kit | Ang-II elisa kit

Mouse Ang-II (Angiotensin II) ELISA Kit

CATALOG #
AAA165959

REACTIVITY
Mouse

PRODUCT SYNONYMS

Ang-II; Mouse Ang-II (Angiotensin II) ELISA Kit; Ang-II elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit recognizes natural and recombinant Mouse Ang-II. No significant cross-reactivity or interference between Mouse Ang-II and analogues was observed.
Samples	Serum, Plasma, Biological Fluids
Assay Type	Competitive
Detection Range	15.625-1000pg/mL
Sensitivity	Min: 9.375pg/mL; Max: 1000pg/mL
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for Ang-II elisa kit

Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse Ang-II concentrations in serum, plasma and other biological fluids.

Principle of the Assay: This ELISA kit uses Competitive-ELISA as the method. The microtiter plate provided in this kit has been pre-coated with Ang-II. During the reaction, Ang-II in the sample or standard competes with a fixed amount of Ang-II on the solid phase supporter for sites on the Biotinylated Detection Ab specific to Ang-II. Excess conjugate and unbound sample or standard are washed from the plate, and Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then a TMB substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of Ang-II in the samples is then determined by comparing the OD of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
