

Mouse Total Cholesterol ELISA Kit | TC elisa kit

Mouse Total Cholesterol ELISA Kit

CATALOG #
AAA16665

REACTIVITY
Mouse

PRODUCT SYNONYMS

Total Cholesterol; Mouse Total Cholesterol ELISA Kit; TC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of CHL. No significant cross-reactivity or interference between CHL and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CHL and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 mmol/L
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TC elisa kit	Principle of the Assay: CHL ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-CHL antibody and an CHL-HRP conjugate. The assay sample and buffer are incubated together with CHL-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CHL concentration since CHL from samples and CHL-HRP conjugate compete for the anti-CHL antibody binding site. Since the number of sites is limited, as more sites are occupied by CHL from the sample, fewer sites are left to bind CHL-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CHL concentration in each sample is interpolated from this standard curve. Intended Uses: This CHL ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse CHL. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	452120630
NCBI Accession #	YP_007470878.1
NCBI GenBank Nucleotide #	NC_020307.1
Molecular Weight	29,822 Da
NCBI Official Full Name	DNase
UniProt Protein Name	DNase
UniProt Entry Name	M4LLI9_SALET

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
