

Human G Protein Coupled Receptor ELISA Kit | GPCR elisa kit

Human G Protein Coupled Receptor ELISA Kit

CATALOG #
AAA16671

REACTIVITY
Human

PRODUCT SYNONYMS

G Protein Coupled Receptor; Human G Protein Coupled Receptor ELISA Kit; GPCR elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of GPCR. No significant cross-reactivity or interference between GPCR and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between GPCR and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive or Sandwich
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 mg/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GPCR elisa kit	Principle of the Assay: GPCR ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-GPCR antibody and an GPCR-HRP conjugate. The assay sample and buffer are incubated together with GPCR-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the GPCR concentration since GPCR from samples and GPCR-HRP conjugate compete for the anti-GPCR antibody binding site. Since the number of sites is limited, as more sites are occupied by GPCR from the sample, fewer sites are left to bind GPCR-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GPCR concentration in each sample is interpolated from this standard curve. Intended Uses: This GPCR ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human GPCR. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	145336679
NCBI GeneID	841725
NCBI Accession #	NP_175700.2
NCBI GenBank Nucleotide #	NM_104170.2
Molecular Weight	46,451 Da
NCBI Official Full Name	G-protein coupled receptor 2
NCBI Official Symbol	GPCR
NCBI Official Synonym Symbols	F14G24.19; F14G24_19; G protein coupled receptor; G-PROTEIN COUPLED RECEPTOR 2; GCR2; GPCR
NCBI Protein Information	G-protein coupled receptor 2
UniProt Protein Name	LanC-like protein GCR2
UniProt Gene Name	GCR2
UniProt Synonym Gene Names	GPCR; At1g52920; F14G24.19
UniProt Entry Name	GCR2_ARATH

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
