

Canine Matrix Metalloproteinase 8 ELISA Kit | MMP-8 elisa kit

Canine Matrix Metalloproteinase 8 ELISA Kit

CATALOG #
AAA16717

REACTIVITY
Canine

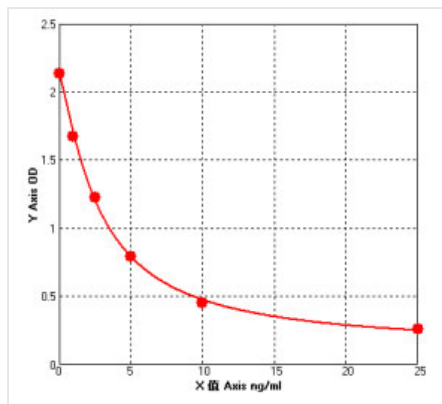

PRODUCT SYNONYMS

Matrix Metalloproteinase 8; Canine Matrix Metalloproteinase 8 ELISA Kit; MMP-8 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of MMP-8. No significant cross-reactivity or interference between MMP-8 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between MMP-8 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MMP-8 elisa kit	Principle of the Assay: MMP-8 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-MMP-8 antibody and an MMP-8-HRP conjugate. The assay sample and buffer are incubated together with MMP-8-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MMP-8 concentration since MMP-8 from samples and MMP-8-HRP conjugate compete for the anti-MMP-8 antibody binding site. Since the number of sites is limited, as more sites are occupied by MMP-8 from the sample, fewer sites are left to bind MMP-8-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MMP-8 concentration in each sample is interpolated from this standard curve. Intended Uses: This MMP-8 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine MMP-8. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for MMP-8 elisa kit	Cancer

NCBI AND UNIPROT INFORMATION

NCBI GI #	71648770
NCBI GeneID	4317
Molecular Weight	53,412 Da
NCBI Official Full Name	matrix metalloproteinase 8 (neutrophil collagenase)
NCBI Official Synonym Full Names	matrix metalloproteinase 8 (neutrophil collagenase)
NCBI Official Symbol	MMP8
NCBI Official Synonym Symbols	HNC; CLG1; MMP-8; PMNL-CL
NCBI Protein Information	neutrophil collagenase; PMNL collagenase; matrix metalloproteinase-8; matrix metalloproteinase 8 (neutrophil collagenase)
UniProt Protein Name	Neutrophil collagenase
UniProt Gene Name	MMP8
UniProt Synonym Gene Names	CLG1; MMP-8; PMNL-CL
UniProt Entry Name	MMP8_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
