ADDITIONAL INFORMATION

Related Product Information for anti-ANXA3 antibody

This gene encodes a member of the annexin family. Members of this calcium-dependent phospholipid-binding protein family play a role in the regulation of cellular growth and in signal transduction pathways. This protein functions in the inhibition of phospholipase A2 and cleavage of inositol 1, 2-cyclic phosphate to form inositol 1-phosphate. This protein may also play a role in anti-coagulation.
