

Porcine Chemokine interferon-inducible protein 10 ELISA Kit | IP-10 elisa kit

Porcine Chemokine interferon-inducible protein 10 ELISA Kit

CATALOG #
AAA16919

REACTIVITY
Porcine

PRODUCT SYNONYMS

Chemokine interferon-inducible protein 10; Porcine Chemokine interferon-inducible protein 10 ELISA Kit; IP-10 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Porcine
Specificity	This assay has high sensitivity and excellent specificity for detection of IP-10. No significant cross-reactivity or interference between IP-10 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between IP-10 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for IP-10 elisa kit	Intended Uses: This IP-10 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Porcine IP-10. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: IP-10 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-IP-10 antibody and an IP-10-HRP conjugate. The assay sample and buffer are incubated together with IP-10-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the IP-10 concentration since IP-10 from samples and IP-10-HRP conjugate compete for the anti-IP-10 antibody binding site. Since the number of sites is limited, as more sites are occupied by IP-10 from the sample, fewer sites are left to bind IP-10-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IP-10 concentration in each sample is interpolated from this standard curve.
Product Categories/Family for IP-10 elisa kit	Immunology

NCBI AND UNIPROT INFORMATION

NCBI GI #	976159
NCBI GeneID	15945
Molecular Weight	10,789 Da
NCBI Official Full Name	IP-10
NCBI Official Synonym Full Names	chemokine (C-X-C motif) ligand 10
NCBI Official Symbol	Cxcl10
NCBI Official Synonym Symbols	C7; IP10; CRG-2; INP10; IP-10; Ifi10; mob-1; Scyb10; gIP-10
NCBI Protein Information	C-X-C motif chemokine 10; gamma-IP10; interferon activated gene 10; small-inducible cytokine B10; interferon-gamma induced protein CRG-2; interferon-gamma-induced protein CRG-2; 10 kDa interferon gamma-induced protein; small inducible cytokine B subfamily (Cys-X-Cys), member 10
UniProt Protein Name	C-X-C motif chemokine 10
UniProt Gene Name	Cxcl10
UniProt Synonym Gene Names	Crg2; Ifi10; Inp10; Scyb10; Gamma-IP10; IP-10
UniProt Entry Name	CXL10_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
