

Bovine Platelet Factor 4 ELISA Kit | PF4 elisa kit

Bovine Platelet Factor 4 ELISA Kit

CATALOG #
AAA16989

REACTIVITY
Bovine

PRODUCT SYNONYMS

Platelet Factor 4; Bovine Platelet Factor 4 ELISA Kit; PF4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of PF4. No significant cross-reactivity or interference between PF4 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PF4 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PF4 elisa kit	Principle of the Assay: PF4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PF4 antibody and an PF4-HRP conjugate. The assay sample and buffer are incubated together with PF4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PF4 concentration since PF4 from samples and PF4-HRP conjugate compete for the anti-PF4 antibody binding site. Since the number of sites is limited, as more sites are occupied by PF4 from the sample, fewer sites are left to bind PF4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PF4 concentration in each sample is interpolated from this standard curve. Intended Uses: This PF4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine PF4. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
