

Chicken Serotonin/5 Hydroxytryptamine ELISA Kit | 5-HT elisa kit

Chicken Serotonin/5 Hydroxytryptamine ELISA Kit

CATALOG #
AAA17020

REACTIVITY
Chicken

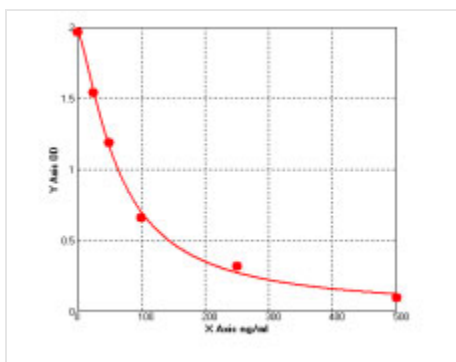

PRODUCT SYNONYMS

Serotonin/5 Hydroxytryptamine; Chicken Serotonin/5 Hydroxytryptamine ELISA Kit; 5-HT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This assay has high sensitivity and excellent specificity for detection of 5HT. No significant cross-reactivity or interference between 5HT and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between 5HT and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for 5-HT elisa kit	Principle of the Assay: 5HT ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-5HT antibody and an 5HT-HRP conjugate. The assay sample and buffer are incubated together with 5HT-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 5HT concentration since 5HT from samples and 5HT-HRP conjugate compete for the anti-5HT antibody binding site. Since the number of sites is limited, as more sites are occupied by 5HT from the sample, fewer sites are left to bind 5HT-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 5HT concentration in each sample is interpolated from this standard curve. Intended Uses: This 5HT ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Chicken 5HT. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for 5-HT elisa kit	Neurobiology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
