

Bovine Leptin ELISA Kit | Leptin elisa kit

Bovine Leptin ELISA Kit

CATALOG #
AAA17041

REACTIVITY
Bovine

PRODUCT SYNONYMS

Leptin; Bovine Leptin ELISA Kit; Leptin elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Bovine
Specificity	This assay has high sensitivity and excellent specificity for detection of LEP. No significant cross-reactivity or interference between LEP and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between LEP and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Leptin elisa kit	Principle of the Assay: LEP ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-LEP antibody and an LEP-HRP conjugate. The assay sample and buffer are incubated together with LEP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LEP concentration since LEP from samples and LEP-HRP conjugate compete for the anti-LEP antibody binding site. Since the number of sites is limited, as more sites are occupied by LEP from the sample, fewer sites are left to bind LEP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LEP concentration in each sample is interpolated from this standard curve. Intended Uses: This LEP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Bovine LEP. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
