

Canine Ferritin ELISA Kit | FE elisa kit

Canine Ferritin ELISA Kit

CATALOG #
AAA17042

REACTIVITY
Canine

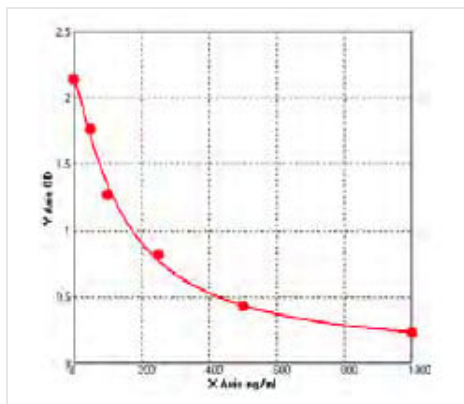

PRODUCT SYNONYMS

Ferritin; Canine Ferritin ELISA Kit; FE elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This assay has high sensitivity and excellent specificity for detection of FE. No significant cross-reactivity or interference between FE and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between FE and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for FE elisa kit	Principle of the Assay: FE ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-FE antibody and an FE-HRP conjugate. The assay sample and buffer are incubated together with FE-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FE concentration since FE from samples and FE-HRP conjugate compete for the anti-FE antibody binding site. Since the number of sites is limited, as more sites are occupied by FE from the sample, fewer sites are left to bind FE-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FE concentration in each sample is interpolated from this standard curve. Intended Uses: This FE ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Canine FE. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	306744
NCBI GeneID	2495
Molecular Weight	21,226 Da
NCBI Official Full Name	ferritin
NCBI Official Synonym Full Names	ferritin, heavy polypeptide 1
NCBI Official Symbol	FTH1
NCBI Official Synonym Symbols	FHC; FTH; HFE5; PLIF; FTHL6; PIG15
NCBI Protein Information	ferritin heavy chain; apoferritin; ferritin H subunit; placenta immunoregulatory factor; proliferation-inducing protein 15; cell proliferation-inducing gene 15 protein
UniProt Protein Name	Ferritin heavy chain
UniProt Gene Name	FTH1
UniProt Synonym Gene Names	FTH; FTHL6; OK/SW-cl.84; PIG15; Ferritin H subunit
UniProt Entry Name	FRIH_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
