

Human pro interleukin 1 beta ELISA Kit | pro-IL1beta elisa kit

Human pro-IL1beta (pro interleukin 1 beta) ELISA Kit

CATALOG #
AAA171434

REACTIVITY
Human

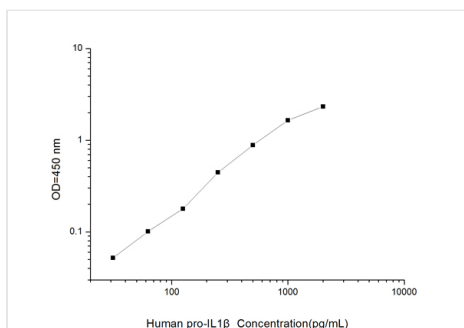

PRODUCT SYNONYMS

pro interleukin 1 beta; Human pro-IL1beta (pro interleukin 1 beta) ELISA Kit; pro-IL1beta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This kit recognizes Human pro-IL1beta in samples. No significant cross-reactivity or interference between Human pro-IL1beta and analogues was observed.
Assay Type	Quantitative Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	31.25-2000pg/mL
Sensitivity	18.75pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Human pro-IL1beta were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Human pro-IL1beta were tested on 3 different plates, 20 replicates in each plate.
Preparation and Storage	Store at 4 degree C.

ADDITIONAL INFORMATION

Related Product Information for pro-IL1beta elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human pro-IL1beta. Standards or samples are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Human pro-IL1beta and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Human pro-IL1beta, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 nm ± 2 nm. The OD value is proportional to the concentration of Human pro-IL1beta. You can calculate the concentration of Human pro-IL1beta in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Human pro-IL1beta concentrations in serum, plasma and other biological fluids.
