

Human Anti Ganglioside M2 Antibody ELISA Kit | GM2 elisa kit

Human Anti Ganglioside M2 Antibody ELISA Kit

CATALOG #
AAA17146

REACTIVITY
Human

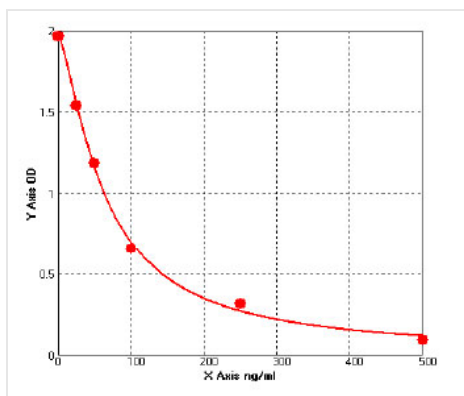

PRODUCT SYNONYMS

Anti Ganglioside M2 Antibody; Human Anti Ganglioside M2 Antibody ELISA Kit; GM2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of Anti-GM2. No significant cross-reactivity or interference between Anti-GM2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between Anti-GM2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for GM2 elisa kit	Principle of the Assay: Anti-GM2 ELISA kit applies the competitive enzyme immunoassay technique utilizing Ganglioside M2 antigen and an Anti-GM2-HRP conjugate. The assay sample and buffer are incubated together with AntiGM2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzymesubstrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the Anti-GM2 concentration since Anti-GM2 from samples and Anti-GM2- HRP conjugate compete for the Ganglioside M2 antigen binding site. Since the number of sites is limited, as more sites are occupied by Anti-GM2 from the sample, fewer sites are left to bind Anti-GM2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Anti-GM2 concentration in each sample is interpolated from this standard curve. Intended Uses: This Anti-GM2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human Anti-GM2. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
Product Categories/Family for GM2 elisa kit	Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
