

Mouse Utrophin ELISA Kit | UTRN elisa kit

Mouse Utrophin ELISA Kit

CATALOG #
AAA17153

REACTIVITY
Mouse

PRODUCT SYNONYMS

Utrophin; Mouse Utrophin ELISA Kit; UTRN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of UTRN. No significant cross-reactivity or interference between UTRN and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between UTRN and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for UTRN elisa kit	Principle of the Assay: UTRN ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-UTRN antibody and an UTRN-HRP conjugate. The assay sample and buffer are incubated together with UTRN-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the UTRN concentration since UTRN from samples and UTRN-HRP conjugate compete for the anti-UTRN antibody binding site. Since the number of sites is limited, as more sites are occupied by UTRN from the sample, fewer sites are left to bind UTRN-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The UTRN concentration in each sample is interpolated from this standard curve. Intended Uses: This UTRN ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse UTRN. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	110611228
NCBI GeneID	7402
NCBI Accession #	NP_009055.2
NCBI GenBank Nucleotide #	NM_007124.2
Molecular Weight	155,026 Da
NCBI Official Full Name	utrophin
NCBI Official Synonym Full Names	utrophin
NCBI Official Symbol	UTRN
NCBI Official Synonym Symbols	DRP; DMDL; DRP1
NCBI Protein Information	utrophin; DRP-1; dystrophin-related protein 1
UniProt Protein Name	Utrophin
UniProt Gene Name	UTRN
UniProt Synonym Gene Names	DMDL; DRP1; DRP-1
UniProt Entry Name	UTRO_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
