

Mouse Lipoxin A4 ELISA Kit | LXA4 elisa kit

Mouse Lipoxin A4 ELISA Kit

CATALOG #
AAA17187

REACTIVITY
Mouse

PRODUCT SYNONYMS

Lipoxin A4; Mouse Lipoxin A4 ELISA Kit; LXA4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of LXA4. No significant cross-reactivity or interference between LXA4 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between LXA4 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for LXA4 elisa kit	Principle of the Assay: LXA4 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-LXA4 antibody and an LXA4-HRP conjugate. The assay sample and buffer are incubated together with LXA4-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LXA4 concentration since LXA4 from samples and LXA4-HRP conjugate compete for the anti-LXA4 antibody binding site. Since the number of sites is limited, as more sites are occupied by LXA4 from the sample, fewer sites are left to bind LXA4-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LXA4 concentration in each sample is interpolated from this standard curve. Intended Uses: This LXA4 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse LXA4. This ELISA kit for research use only, not for therapeutic or diagnostic applications!
