

Human S adenosyl L methionine ELISA Kit | SAM elisa kit

Human S adenosyl L methionine ELISA Kit

CATALOG #
AAA17241

REACTIVITY
Human

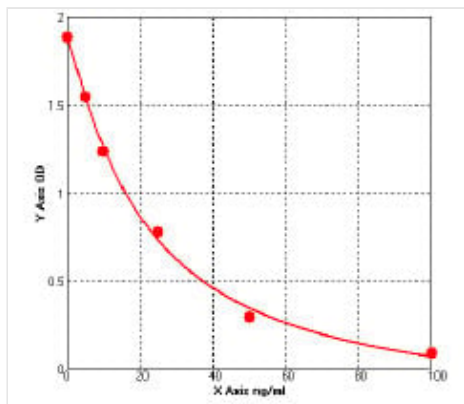

PRODUCT SYNONYMS

S adenosyl L methionine; Human S adenosyl L methionine ELISA Kit; SAM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of SAM. No significant cross-reactivity or interference between SAM and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between SAM and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SAM elisa kit	Principle of the Assay: SAM ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-SAM antibody and an SAM-HRP conjugate. The assay sample and buffer are incubated together with SAM-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SAM concentration since SAM from samples and SAM-HRP conjugate compete for the anti-SAM antibody binding site. Since the number of sites is limited, as more sites are occupied by SAM from the sample, fewer sites are left to bind SAM-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SAM concentration in each sample is interpolated from this standard curve. Intended Uses: This SAM ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human SAM. This ELISA kit for research use only, not for therapeutic or diagnostic applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	523653143
NCBI Accession #	WP_020787021.1
NCBI GenBank Nucleotide #	WP_020787021.1
Molecular Weight	39,097 Da
NCBI Official Full Name	S-adenosyl-L-methionine
UniProt Protein Name	S-adenosyl-L-methionine
UniProt Entry Name	S7QY86_9MYCO

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
