

Human Mycobacterium tuberculosis Immunogenic protein MPT64 ELISA Kit | MPT64 elisa kit

Human Mycobacterium tuberculosis Immunogenic protein MPT64 ELISA Kit

CATALOG # AAA17294	REACTIVITY Human
------------------------------	----------------------------

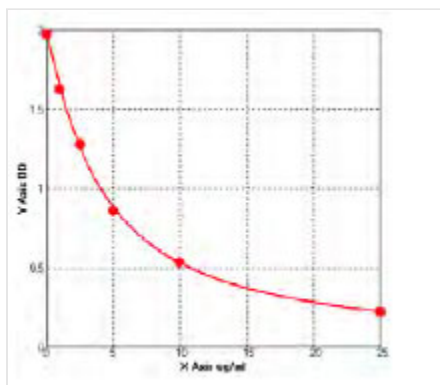

PRODUCT SYNONYMS

Mycobacterium tuberculosis Immunogenic protein MPT64; Human Mycobacterium tuberculosis Immunogenic protein MPT64 ELISA Kit; MPT64 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of MPT64. No significant cross-reactivity or interference between MPT64 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between MPT64 and all the analogues, therefore, cross reaction may still exist in some cases.
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ?g/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for MPT64 elisa kit	Intended Uses: This MPT64 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human MPT64. This ELISA kit for research use only, not for therapeutic or test applications! Principle of the Assay: MPT64 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-MPT64 antibody and an MPT64-HRP conjugate. The assay sample and buffer are incubated together with MPT64-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the MPT64 concentration since MPT64 from samples and MPT64-HRP conjugate compete for the anti-MPT64 antibody binding site. Since the number of sites is limited, as more sites are occupied by MPT64 from the sample, fewer sites are left to bind MPT64-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The MPT64 concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	41409388
NCBI Accession #	NP_962224.1
NCBI GenBank Nucleotide #	NC_002944.2
NCBI Official Full Name	Mpt64

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
