

## Rabbit anti-Human, Mouse AP2A1 Polyclonal Antibody | anti-AP2A1 antibody

AP2A1 Polyclonal Antibody

| CATALOG # | HOST   | REACTIVITY   | APPLICATIONS                              |
|-----------|--------|--------------|-------------------------------------------|
| AAA173399 | Rabbit | Human, Mouse | Immunohistochemistry, Western Blot, ELISA |

### PRODUCT SYNONYMS

AP2A1; Polyclonal Antibody; AP2A1 Polyclonal Antibody; ADTAA; CLAPA1; AP2-ALPHA; anti-AP2A1 antibody

### PRODUCT SPECIFICATIONS

|                                                 |                                                      |
|-------------------------------------------------|------------------------------------------------------|
| Host                                            | Rabbit                                               |
| Reactivity                                      | Human, Mouse                                         |
| Clonality                                       | Polyclonal                                           |
| Isotype                                         | IgG                                                  |
| Purity/Purification                             | Antigen Affinity Purification                        |
| Concentration                                   | 0.9mg/ml (varies by lot)                             |
| Sequence Length                                 | 982                                                  |
| Applicable Applications for anti-AP2A1 antibody | IHC (Immunohistochemistry), WB (Western Blot), ELISA |
| Immunogen                                       | Synthetic peptide of human AP2A1                     |
| Buffer                                          | PBS with 0.05% sodium azide, 50% glycerol, pH7.3     |
| Preparation and Storage                         | Store at -20 degree C. Avoid freeze/thaw cycles.     |

ADDITIONAL INFORMATION

|                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-----------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Related Product Information for anti-AP2A1 antibody | This gene encodes the alpha 1 adaptin subunit of the adaptor protein 2 (AP-2) complex found in clathrin coated vesicles. The AP-2 complex is a heterotetramer consisting of two large adaptins (alpha or beta), a medium adaptin (mu), and a small adaptin (sigma). The complex is part of the protein coat on the cytoplasmic face of coated vesicles which links clathrin to receptors in vesicles. Alternative splicing of this gene results in two transcript variants encoding two different isoforms. |
