

## Human Histone H4 ELISA Kit | HIST1H4A elisa kit

Human Histone H4 ELISA Kit

CATALOG #  
**AAA17409**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Histone H4; Human Histone H4 ELISA Kit; HIST1H4A/Histone H4/H4/A/H4FA/H4F2/histone cluster 4; H4; HIST1H4A elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                   |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                             |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of HIST1H4A. No significant cross-reactivity or interference between HIST1H4A and analogues was observed. |
| Sequence Length         | 103                                                                                                                                                                               |
| Assay Type              | Sandwich                                                                                                                                                                          |
| Samples                 | Serum, plasma, tissue homogenates and other biological fluids                                                                                                                     |
| Detection Range         | 0.156-10ng/ml                                                                                                                                                                     |
| Sensitivity             | 0.094ng/ml                                                                                                                                                                        |
| Intra-assay Precision   | CV<8%                                                                                                                                                                             |
| Inter-assay Precision   | CV<10%                                                                                                                                                                            |
| Preparation and Storage | Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C                      |

### ADDITIONAL INFORMATION

#### Related Product Information for HIST1H4A elisa kit

Principle of the Assay: This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Capture antibody was pre-coated onto 96-well plates. And the biotin conjugated antibody was used as detection antibodies. The standards, test samples and biotin conjugated detection antibody were added to the wells subsequently, and washed with wash buffer. HRP-Streptavidin was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the target amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of target can be calculated.
