ADDITIONAL INFORMATION

Related Product Information for anti-IL17RD antibody	This gene encodes a membrane protein belonging to the interleukin-17 receptor (IL-17R) protein family. The encoded protein is a component of the interleukin-17 receptor signaling complex, and the interaction between this protein and IL-17R does not require the interleukin. The gene product also affects fibroblast growth factor signaling, inhibiting or stimulating growth through MAPK/ERK signaling. Alternate splicing generates multiple transcript variants encoding distinct isoforms.
Product Categories/Family for anti-IL17RD antibody	Immunology; Signal Transduction; Cancer
