

Human beta2-Glycoprotein 1 Antibody IgG ELISA Kit | beta2-GP1 Ab IgG elisa kit

Human beta2-Glycoprotein 1 Antibody IgG ELISA Kit

CATALOG #
AAA17607

REACTIVITY
Human

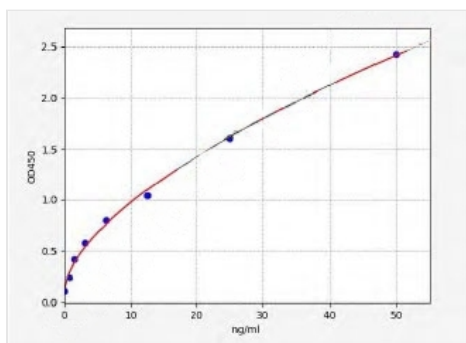

PRODUCT SYNONYMS

beta2-Glycoprotein 1 Antibody IgG; Human beta2-Glycoprotein 1 Antibody IgG ELISA Kit; b2-GP1 Ab IgG ; b2-Glycoprotein 1 Antibody IgG; beta2-GP1 Ab IgG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of beta2-GP1 Ab IgG. No significant cross-reactivity or interference between beta2-GP1 Ab IgG and analogues was observed.
Assay Type	Indirect ELISA
Samples	Serum, Plasma, Cell Culture Supernatant, cell or tissue lysate, Other liquid samples
Detection Range	0.781-50ng/ml
Sensitivity	0.469ng/ml
Intra-assay Precision	CV<8%
Inter-assay Precision	CV<10%
Preparation and Storage	Store entire kit at 2-8C for short-term. For longer-term, please store the microplate & standard at -20C, while the remaining reagents can be stored at 2-8C

ADDITIONAL INFORMATION

Related Product Information for beta2-GP1 Ab IgG elisa kit	Principle of the Assay: This kit was based on sandwich enzyme-linked immune-sorbent assay technology. Antigen was pre-coated onto 96-well plates. And the Biotin-labeled antibody was used as detection antibody. The standards, test samples and Biotin-labeled antibody were added to the wells subsequently, and wash with wash buffer. HRP-Streptavidin Conjugate was added and unbound conjugates were washed away with wash buffer. TMB substrates were used to visualize HRP enzymatic reaction. TMB was catalyzed by HRP to produce a blue color product that changed into yellow after adding acidic stop solution. The density of yellow is proportional to the target amount of sample captured in plate. Read the O.D. absorbance at 450nm in a microplate reader, and then the concentration of target can be calculated.
