ADDITIONAL INFORMATION

Related Product Information for anti-MARCKSL1 antibody	This gene encodes a member of the myristoylated alanine-rich C-kinase substrate (MARCKS) family. Members of this family play a role in cytoskeletal regulation, protein kinase C signaling and calmodulin signaling. The encoded protein affects the formation of adherens junction. Alternative splicing results in multiple transcript variants. Pseudogenes of this gene are located on the long arm of chromosomes 6 and 10.
Product Categories/Family for anti-MARCKSL1 antibody	Cancer; Signal Transduction
