

General Neo (Neomycin) ELISA Kit | Neo elisa kit

Neo (Neomycin) ELISA Kit

CATALOG #
AAA176964

REACTIVITY
General

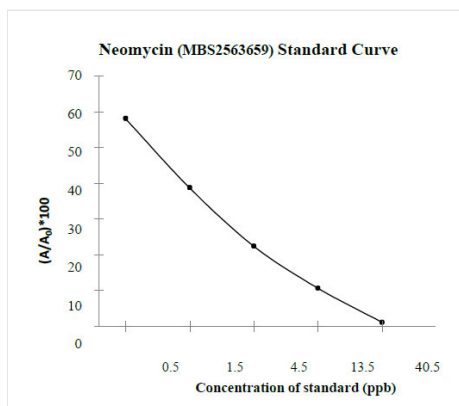

PRODUCT SYNONYMS

Neo (Neomycin); Neo (Neomycin) ELISA Kit; Neo elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	Muscle, Egg ---50 ppb; Raw Milk ---20 ppb
Sequence Length	264
Assay Type	Competitive
Sensitivity	0.5 ppb (ng/mL)
Preparation and Storage	Store at 2-8 degree C. Avoid freeze.

ADDITIONAL INFORMATION

Related Product Information for Neo elisa kit

Principle of the Assay: This kit uses Competitive-ELISA as the method. It can detect Neomycin (Neo) in samples, such as muscle, raw milk, etc. This kit is composed of ELISA Microtiter plate, HRP conjugate, antibody working solution, standard and other supplementary reagents. The microtiter plate in this kit has been pre-coated with coupled antigen. During the reaction, Neo in the samples or standard competes with coupled antigen on the solid phase supporter for sites of anti-Neo antibody. Then Horseradish Peroxidase (HRP) conjugate is added to each microtiter plate well, and substrate reagent is added for color development. There is a negative correlation between the OD value of samples and the concentration of Neo. The concentration of Neo in the samples can be calculated by comparing the OD of the samples to the standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1142720552
NCBI Official Full Name	Neomycin

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
