

General OTA (Ochratoxin A) ELISA Kit | OTA elisa kit

OTA (Ochratoxin A) ELISA Kit

CATALOG #
AAA176971

REACTIVITY
General

PRODUCT SYNONYMS

OTA (Ochratoxin A); OTA (Ochratoxin A) ELISA Kit; OTA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Assay Type	Competitive
Detection Range	Grain---1 ppb; Feed---2 ppb
Sensitivity	0.1 ppb (ng/mL)
Preparation and Storage	Store at 2-8 degree C. Avoid freeze.

ADDITIONAL INFORMATION

Related Product Information for OTA elisa kit

Principle of the Assay: This kit uses Competitive-ELISA as the method. It can detect Ochratoxin A (OTA) in samples, such as grain, feed, etc. This kit is composed of ELISA Microtiter plate, HRP conjugate, antibody working solution, standard and other supplementary reagents. The microtiter plate in this kit has been pre-coated with coupled antigen. During the reaction, OTA in the samples or standard competes with coupled antigen on the solid phase supporter for sites of anti- OTA antibody. Then Horseradish Peroxidase (HRP) conjugate is added to each microtiter plate well, and substrate reagent is added for color development. There is a negative correlation between the OD value of samples and the concentration of OTA. The concentration of OTA in the samples can be calculated by comparing the OD of the samples to the standard curve.
