

Mouse anti-Human CD20 Monoclonal Antibody | anti-CD20 antibody

CD20 Monoclonal Antibody

CATALOG # AAA177744	HOST Mouse	REACTIVITY Human	APPLICATIONS Immunohistochemistry
-------------------------------	----------------------	----------------------------	---

PRODUCT SYNONYMS

CD20; Monoclonal Antibody; CD20 Monoclonal Antibody; anti-CD20 antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Clone Number	YN00276m
Applicable Applications for anti-CD20 antibody	IHC (Immunohistochemistry)
Incubation	Incubate at RT (18-30°C) for 60 min or incubate at 4°C for overnight.
Localization	Cell Membrane
Notices	1.The product should be operated by experienced researchers. 2.This product is for Immunohistochemistry use only. 3.The product should be followed by detection kits such as Secondary antibody and DAB kits. 4.Protective measures should be taken to avoid contact with skin and eyes. 5.The product contains sodium azide as an antiseptic. Sodium azide can react with lead or copper to form an explosive metal azide. A large amount of water is used to avoid the formation of metal azides. 6.This product is biological resource, and its treatment should meet the relevant requirements.
Preparation and Storage	The concentrated antibody should be stored at -20°C protecting from light. It is recommended to sub-pack into several small tubes for the first use. Take one tube each time. Avoid freeze / thaw cycles. The expiration of this antibody is 12 months. Please follow this manual to store the antibody to avoid badly affecting the titer and effective service life of the product.

ADDITIONAL INFORMATION

Related Product Information for anti-CD20 antibody	CD20 is mainly expressed on B cells, Pro B cell anaphase and other B cells expect Plasma cells, CD20 Antibody does not cross-react with T cells which possesses better cellular specificity to B cell lymphoma and acute & chronic lymphocytic leukemia, etc.
Product Categories/Family for anti-CD20 antibody	RTU for IHC

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
