

Mouse CORT (Corticosterone) ELISA Kit

QuickKey Pro Mouse CORT (Corticosterone) ELISA Kit

CATALOG #
AAA177821

REACTIVITY
Mouse

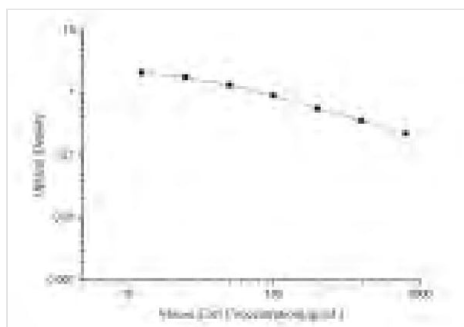

PRODUCT SYNONYMS

CORT (Corticosterone); QuickKey Pro Mouse CORT (Corticosterone) ELISA Kit; Corticosterone; CORT; CORT (Corticosterone) elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Assay Type	Quantitative Competitive
Samples	Mouse serum, plasma, saliva and urine samples.
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Mouse Cort were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Mouse Cort were tested on 3 different plates, 20 replicates in each plate, respectively
Preparation and Storage	An unopened kit can be stored at 2-8 degree C for 6 months.

ADDITIONAL INFORMATION

Related Product Information for CORT (Corticosterone) elisa kit

Principle of the Assay: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Mouse Cort. Samples (or Standards) and Horseradish Peroxidase (HRP) linked antibody specific for Mouse Cort are added to the micro ELISA plate wells. Mouse Cort in samples (or standards) competes with a fixed amount of Cort on the solid phase supporter for sites on the HRP linked detection antibody specific to Cort. Excess conjugate and unbound sample or standard are washed from the plate. The substrate solution is added to each well. The enzymesubstrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450±2 nm. The concentration of Mouse Cort in the samples is then determined by comparing the OD of the samples to the standard curve.

Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Cort concentrations in Mouse serum, plasma, saliva and urine samples. Please contact tech-support for other sample type detection.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
