

General Col (Colistin) ELISA Kit | Col elisa kit

Col (Colistin) ELISA Kit

CATALOG #
AAA177859

REACTIVITY
General

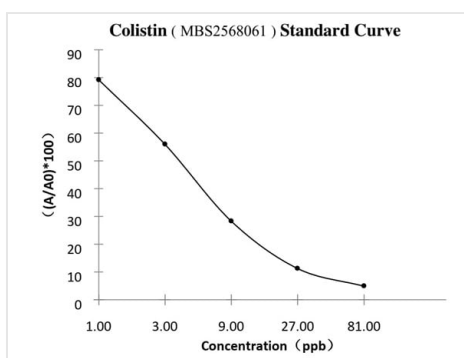

PRODUCT SYNONYMS

Col (Colistin); Col (Colistin) ELISA Kit; Col elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Assay Type	Competitive
Sensitivity	1 ppb (ng/mL)
Preparation and Storage	Store at 2-8 degree C. Avoid freeze/thaw cycles. Estimated Exp: >=10 months

ADDITIONAL INFORMATION

Related Product Information for Col elisa kit

Principle of the Assay: This kit uses Competitive-ELISA as the method. It can detect Colistin (Col) in samples, such as muscle, urine, etc. This kit is composed of ELISA Microtiter plate, HRP conjugate, antibody working solution, standard and other supplementary reagents. The microtiter plate provided in this kit has been pre-coated with coupled antigen. During the detection, Col in the samples or standard competes with coupled antigen on the solid phase supporter for sites of anti-Col antibody. Then Horseradish Peroxidase (HRP) conjugate is added to each well, and substrate reagent is added for color development. There is a negative correlation between the OD value of samples and the concentration of Col. The concentration of Col in the samples can be calculated by comparing the OD of the samples to the standard curve.
