

General CAP (Chloramphenicol) ELISA Kit | CAP elisa kit

CAP (Chloramphenicol) ELISA Kit

CATALOG #
AAA177866

REACTIVITY
General

PRODUCT SYNONYMS

CAP (Chloramphenicol); CAP (Chloramphenicol) ELISA Kit; CAP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Assay Type	Competitive
Sensitivity	0.025 ppb (ng/mL)
Preparation and Storage	Store at 2-8 degree C. Avoid freeze/thaw cycles. Estimated Exp: >=10 months

ADDITIONAL INFORMATION

Related Product Information for CAP elisa kit

Principle of the Assay: This kit uses Competitive-ELISA as the method. It can detect Chloramphenicol (CAP) in samples, such as, muscle, milk, etc. This kit is composed of ELISA Microtiter plate, HRP conjugate, antibody working solution, standard and other supplementary reagents. The microtiter plate in this kit has been pre-coated with coupled antigen. During the reaction, CAP in the samples or standard competes with coupled antigen on the solid phase supporter for sites of anti-CAP antibody. Then Horseradish Peroxidase (HRP) conjugate is added to each microtiter plate well, and substrate reagent is added for color development. There is a negative correlation between the OD value of samples and the concentration of CAP. The concentration of CAP in the samples can be calculated by comparing the OD of the samples to the standard curve.
