

Canine E3 (Estriol) ELISA Kit | E3 elisa kit

QuickKey Pro Canine E3 (Estriol) ELISA Kit

CATALOG #
AAA177873

REACTIVITY
Canine

PRODUCT SYNONYMS

E3 (Estriol); QuickKey Pro Canine E3 (Estriol) ELISA Kit; Estriol; E3; E3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Canine
Specificity	This kit recognizes E3 in Canine samples. No significant crossreactivity or interference between Canine E3 and analogues was observed
Assay Type	Quantitative Competitive
Samples	Canine serum and plasma samples
Detection Range	3.13-200 pg/mL
Sensitivity	1.17 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Dog E3 were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Dog E3 were tested on 3 different plates, 20 replicates in each plate, respectively
Preparation and Storage	An unopened kit can be stored at 2-8° for 6 months. After test, the unused wells and reagents should be stored according to the table/manual.

ADDITIONAL INFORMATION

Related Product Information for E3 elisa kit	Principle of the Assay: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Canine E3. Samples (or Standards) and Horseradish Peroxidase (HRP) linked antibody specific for Canine E3 are added to the micro ELISA plate wells. Canine E3 in samples (or standards) competes with a fixed amount of E3 on the solid phase supporter for sites on the HRP linked detection antibody specific to E3. Excess conjugate and unbound sample or standard are washed from the plate. The substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450±2 nm. The concentration of Canine E3 in the samples is then determined by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of E3 concentrations in Canine serum and plasma samples. Please contact tech-support for other sample type detection.
