

Chicken Pg (Progesterone) ELISA Kit | Pg elisa kit

QuickKey Pro Chicken Pg (Progesterone) ELISA Kit

CATALOG #
AAA177877

REACTIVITY
Chicken

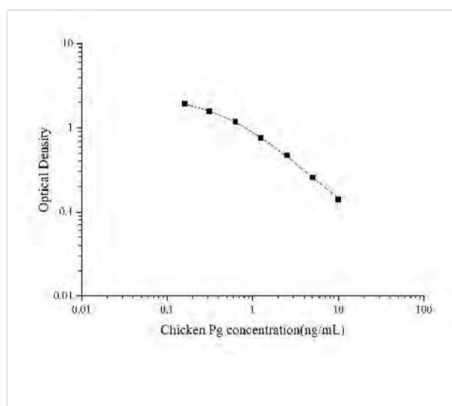

PRODUCT SYNONYMS

Pg (Progesterone); QuickKey Pro Chicken Pg (Progesterone) ELISA Kit; Progesterone; Pg; Pg elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Chicken
Specificity	This kit recognizes Pg in Chicken samples. No significant crossreactivity or interference between Chicken Pg and analogues was observed
Assay Type	Quantitative Competitive
Samples	Chicken serum and plasma samples
Detection Range	0.16-10 ng/mL
Sensitivity	0.06 ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Chicken Pg were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Chicken Pg were tested on 3 different plates, 20 replicates in each plate, respectively
Preparation and Storage	An unopened kit can be stored at 2-8° for 6 months. After test, the unused wells and reagents should be stored according to the table/manual.

ADDITIONAL INFORMATION

Related Product Information for Pg elisa kit	Principle of the Assay: This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Chicken Pg. Samples (or Standards) and Horseradish Peroxidase (HRP) linked antibody specific for Chicken Pg are added to the micro ELISA plate wells. Chicken Pg in samples (or standards) competes with a fixed amount of Pg on the solid phase supporter for sites on the HRP linked detection antibody specific to Pg. Excess conjugate and unbound sample or standard are washed from the plate. The substrate solution is added to each well. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450±2 nm. The concentration of Chicken Pg in the samples is then determined by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Pg concentrations in Chicken serum and plasma samples. Please contact tech-support for other sample type detection.
