| CATALOG #<br><b>AAA178014</b> | HOST<br><b>Rabbit</b> | REACTIVITY<br><b>All</b> | APPLICATIONS<br><b>Immunofluorescence, Western Blot</b> |
|-------------------------------|-----------------------|--------------------------|---------------------------------------------------------|

### PRODUCT SYNONYMS

HA-Tag; Monoclonal Antibody; HA-Tag Monoclonal Antibody; HA epitope tag; HA1; HA2; hemagglutinin; Hemagglutinin HA1 chain; Hemagglutinin HA2 chain; anti-HA antibody

### PRODUCT SPECIFICATIONS

|                                              |                                                                                     |
|----------------------------------------------|-------------------------------------------------------------------------------------|
| Host                                         | Rabbit                                                                              |
| Reactivity                                   | All                                                                                 |
| Clonality                                    | Monoclonal                                                                          |
| Isotype                                      | IgG                                                                                 |
| Purity/Purification                          | Protein A/G Purified                                                                |
| Form/Format                                  | PBS with 0.1% sodium azide, 50% glycerol, pH 7.4                                    |
| Concentration                                | 1mg/mL (varies by lot)                                                              |
| Applicable Applications for anti-HA antibody | IF (Immunofluorescence), WB (Western Blot)                                          |
| Immunogen                                    | Synthetic peptide corresponding to HA tag conjugated to keyhole limpet haemocyanin. |
| Conjugation                                  | Unconjugated                                                                        |
| Preparation and Storage                      | Store at -20 degree C. Avoid freeze/thaw cycles.                                    |

### IMAGES

#### IF (Immunofluorescence)

Immunofluorescent analysis of 293F cells transfected with the HA-GFP using anti-HA-Tag Monoclonal Antibody at 1:2000 dilution.

#### WB (Western Blot)

Western blotting of 293 cell lysates transfected with 3 different HA-tagged genes using anti-HA-Tag Monoclonal Antibody at dilution of 1:5000.

### ADDITIONAL INFORMATION

#### Related Product Information for anti-HA antibody

The HA tag is derived from the HA-molecule corresponding to amino acids 98-106. It has been extensively used as a general epitope tag in expression vectors. Many recombinant proteins have been engineered to express the HA tag, which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
