

Mouse REN (Renin) ELISA Kit | REN elisa kit

MS Mouse REN (Renin) ELISA Kit

CATALOG #
AAA178068

REACTIVITY
Mouse

PRODUCT SYNONYMS

REN (Renin); MS Mouse REN (Renin) ELISA Kit; REN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This kit recognizes Mouse REN in samples. No significant cross-reactivity or interference between Mouse REN and analogues was observed
Assay Type	Quantitative Sandwich
Samples	Serum, plasma and other biological fluids
Detection Range	7.81-500 pg/mL
Sensitivity	4.52 pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, mid range and high level Mouse REN were tested 20 times on one plate, respectively.
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, mid range and high level Mouse REN were tested on 3 different plates, 20 replicates in each plate, respectively.
Preparation and Storage	An unopened kit can be stored at 2-8 degree C for 1 month. If the kit is not supposed to be used within 1 month, store the components separately according to the following conditions once the kit is received.

ADDITIONAL INFORMATION

Related Product Information for REN elisa kit	Principle of the Assay: This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Mouse REN. Samples (or Standards) are added to the micro ELISA plate wells and combined with the specific antibody. Then a biotinylated detection antibody specific for Mouse REN and Avidin-Horseradish Peroxidase (HRP) conjugate are added successively to each micro plate well and incubated. Free components are washed away. The substrate solution is added to each well. Only those wells that contain Mouse REN, biotinylated detection antibody and Avidin-HRP conjugate will appear blue in color. The enzyme-substrate reaction is terminated by the addition of stop solution and the color turns yellow. The optical density (OD) is measured spectrophotometrically at a wavelength of 450 ± 2 nm. The OD value is proportional to the concentration of Mouse REN. You can calculate the concentration of Mouse REN in the samples by comparing the OD of the samples to the standard curve. Intended Uses: This ELISA kit applies to the in vitro quantitative determination of Mouse REN concentrations in serum, plasma and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	13676837
NCBI GeneID	19701
NCBI Accession #	NP_112469.1
NCBI GenBank Nucleotide #	NM_031192.3
UniProt Accession #	P06281; P97911; Q543E5; Q62153; Q62154
Molecular Weight	160,000
NCBI Official Full Name	renin-1
NCBI Official Synonym Full Names	renin 1 structural
NCBI Official Symbol	Ren1
NCBI Official Synonym Symbols	Ren; Rnr; Rn-1; Ren-1; Ren-A; Ren1c; Ren1d; D19352
NCBI Protein Information	renin-1; renin b; kidney renin; aspartyl-protease; angiotensinogenase
UniProt Protein Name	Renin-1
UniProt Gene Name	Ren1
UniProt Synonym Gene Names	Ren; Ren-1
UniProt Entry Name	RENI1_MOUSE

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
