

## Human hyaluronan binding protein 2 ELISA Kit | HABP2 elisa kit

Human Hyaluronan-binding protein 2, HABP2 ELISA Kit

CATALOG #  
**AAA18060**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

hyaluronan binding protein 2; Human Hyaluronan-binding protein 2; HABP2 ELISA Kit; Human Hyaluronan-binding protein 2 (HABP2) ELISA kit; FSAP; HABP; HGFAL; PHBP; factor VII activating protein; hepatocyte growth factor activator-like protein; hyaluronic acid binding protein 2; plasma hyaluronan binding protein; HABP2 elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                         |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                                   |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of human HABP2. No significant cross-reactivity or interference between human HABP2 and analogues was observed. |
| Sequence Length         | 534                                                                                                                                                                                     |
| Assay Type              | Quantitative Sandwich                                                                                                                                                                   |
| Samples                 | Serum, plasma, tissue homogenates                                                                                                                                                       |
| Detection Range         | 0.312 ng/ml-20 ng/ml                                                                                                                                                                    |
| Sensitivity             | < 0.078 ng/ml                                                                                                                                                                           |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.                                        |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.                                                 |
| Preparation and Storage | Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.                                                       |

| Related Product Information for HABP2 elisa kit | Principle of the Assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for HABP2 has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any HABP2 present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for HABP2 is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of HABP2 bound in the initial step. The color development is stopped and the intensity of the color is measured. |
