

Mouse Transforming Growth Factor Beta 2 (TGFb2) ELISA Kit | TGFb2 elisa kit

Mouse Transforming Growth Factor Beta 2 (TGFb2) ELISA Kit

CATALOG #
AAA181876

REACTIVITY
Mouse

PRODUCT SYNONYMS

Transforming Growth Factor Beta 2 (TGFb2); Mouse Transforming Growth Factor Beta 2 (TGFb2) ELISA Kit; TGF-B2; TGF-Beta2; G-TSF; LAP; Cetermin; Polyergin; Latency-associated peptide; BSC-1 cell growth inhibitor; Glioblastoma-derived T-cell suppressor factor; TGFb2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of Transforming Growth Factor Beta 2 (TGFb2). No significant cross-reactivity or interference between Transforming Growth Factor Beta 2 (TGFb2) and analogues was observed.
Sequence Length	413
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue Homogenates, Cell Culture Supernates and Other Biological Fluids
Detection Range	24.69-2000pg/mL
Sensitivity	< 8.93pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Transforming Growth Factor Beta 2 (TGFb2) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Transforming Growth Factor Beta 2 (TGFb2) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for TGFb2 elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Transforming Growth Factor Beta 2 (TGFb2) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Transforming Growth Factor Beta 2 (TGFb2) and unlabeled Transforming Growth Factor Beta 2 (TGFb2) (Standards or samples) with the pre-coated antibody specific to Transforming Growth Factor Beta 2 (TGFb2). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Transforming Growth Factor Beta 2 (TGFb2) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Transforming Growth Factor Beta 2 (TGFb2) in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	557563
NCBI GeneID	7042
Molecular Weight	50,573 Da
NCBI Official Full Name	transforming growth factor beta 2
NCBI Official Synonym Full Names	transforming growth factor beta 2
NCBI Official Symbol	TGFB2
NCBI Official Synonym Symbols	LDS4; G-TSF; TGF-beta2
NCBI Protein Information	transforming growth factor beta-2
UniProt Protein Name	Transforming growth factor beta-2
UniProt Gene Name	TGFB2
UniProt Synonym Gene Names	TGF-beta-2; G-TSF; LAP

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
