

Neurogranin (NRGN) ELISA Kit | NRGN elisa kit

Multi-species Neurogranin (NRGN) ELISA Kit

CATALOG #
AAA181933

REACTIVITY
Human, Mouse, Rat

PRODUCT SYNONYMS

Neurogranin (NRGN); Multi-species Neurogranin (NRGN) ELISA Kit; Human/Mouse/Rat Neurogranin (NRGN) (Competitive ELISA) ELISA Kit; Ng; NEUG; Protein Kinase C Substrate RC3; NRGN elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human, Mouse, Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of Neurogranin (NRGN). No significant cross-reactivity or interference between Neurogranin (NRGN) and analogues was observed.
Sequence Length	78
Assay Type	Competitive Inhibition
Samples	Serum, Plasma, Tissue Homogenates, Cell Lysates, Cell Culture Supernates and Other Biological Fluids
Detection Range	39.06-10,000pg/mL
Sensitivity	< 15.24pg/mL
Application	Enzyme-linked immunosorbent assay for Antigen Detection.
Intra-assay Precision (Precision within an assay)	3 samples with low, middle and high level Neurogranin (NRGN) were tested 20 times on one plate, respectively.
Inter-assay Precision (Precision between assays)	3 samples with low, middle and high level Neurogranin (NRGN) were tested on 3 different plates, 8 replicates in each plate.
CV(%) =	SD/meanX100
Intra-Assay	CV<10%
Inter-Assay	CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for NRGN elisa kit	This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Neurogranin (NRGN) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Neurogranin (NRGN) and unlabeled Neurogranin (NRGN) (Standards or samples) with the pre-coated antibody specific to Neurogranin (NRGN). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Neurogranin (NRGN) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Neurogranin (NRGN) in the sample.
