

General Leukotriene A4 (LTA4) ELISA Kit | LTA4 elisa kit

General Leukotriene A4 (LTA4) ELISA Kit

CATALOG #
AAA181992

REACTIVITY
General

PRODUCT SYNONYMS

Leukotriene A4 (LTA4); General Leukotriene A4 (LTA4) ELISA Kit; LT-A4; LTA4 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of LTA4. No significant cross-reactivity or interference between LTA4 and analogues was observed.
Sequence Length	612
Assay Type	Quantitative Competitive
Samples	Serum, plasma, tissue homogenates, cell culture supernates and other biological fluids
Detection Range	123.5-10,000pg/mL
Sensitivity	< 48.3pg/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level LTA4 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level LTA4 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for LTA4 elisa kit	Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to LTA4 has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled LTA4 and unlabeled LTA4 (Standards or samples) with the pre-coated antibody specific to LTA4. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of LTA4 in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of LTA4 in the sample. Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of LTA4 in serum, plasma, tissue homogenates, cell culture supernates and other biological fluids.

NCBI AND UNIPROT INFORMATION

NCBI GI #	358342068
Molecular Weight	70,061 Da
NCBI Official Full Name	leukotriene-A4 hydrolase
UniProt Protein Name	Leukotriene-A4 hydrolase
UniProt Gene Name	CLF_103297

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
