

## Human Fibroblast Growth Factor 2, Basic (FGF2) ELISA Kit | FGF2 elisa kit

Human Fibroblast Growth Factor 2, Basic (FGF2) ELISA Kit

CATALOG #  
**AAA182025**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

Fibroblast Growth Factor 2; Basic (FGF2); Human Fibroblast Growth Factor 2; Basic (FGF2) ELISA Kit; B-FGF; BFGF; FGFB; HBGH-2; Basic Fibroblast Growth Factor; Heparin-binding growth factor 2; FGF2 elisa kit

### PRODUCT SPECIFICATIONS

| Reactivity                                        | Human                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Specificity                                       | This assay has high sensitivity and excellent specificity for detection of Fibroblast Growth Factor 2, Basic (FGF2). No significant cross-reactivity or interference between Fibroblast Growth Factor 2, Basic (FGF2) and analogues was observed.                                                                                                                                                                                                                                          |
| Sequence Length                                   | 288                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Inter-Assay                                       | CV<12%                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Preparation and Storage                           | The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition.<br>To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end. |

| Related Product Information for FGF2 elisa kit | This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to Fibroblast Growth Factor 2, Basic (FGF2) has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled Fibroblast Growth Factor 2, Basic (FGF2) and unlabeled Fibroblast Growth Factor 2, Basic (FGF2) (Standards or samples) with the pre-coated antibody specific to Fibroblast Growth Factor 2, Basic (FGF2). After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of Fibroblast Growth Factor 2, Basic (FGF2) in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of Fibroblast Growth Factor 2, Basic (FGF2) in the sample. |
