

General Vitamin B6 (VB6) ELISA Kit | VB6 elisa kit

General Vitamin B6 (VB6) ELISA Kit

CATALOG #
AAA182173

REACTIVITY
General

PRODUCT SYNONYMS

Vitamin B6 (VB6); General Vitamin B6 (VB6) ELISA Kit; Pyridoxine; VB6 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	General
Specificity	This assay has high sensitivity and excellent specificity for detection of VB6. No significant cross-reactivity or interference between VB6 and analogues was observed.
Sequence Length	319
Samples	Serum, plasma and other biological fluids
Assay Type	Quantitative Competitive
Detection Range	3.70-300ng/mL
Sensitivity	<1.42ng/mL
Intra-assay Precision	Intra-assay Precision (Precision within an assay): 3 samples with low, middle and high level VB6 were tested 20 times on one plate, respectively. Intra-Assay: CV<10%
Inter-assay Precision	Inter-assay Precision (Precision between assays): 3 samples with low, middle and high level VB6 were tested on 3 different plates, 8 replicates in each plate. CV(%) = SD/meanX100. Inter-Assay: CV<12%
Preparation and Storage	The stability of kit is determined by the loss rate of activity. The loss rate of this kit is less than 5% within the expiration date under appropriate storage condition. To minimize extra influence on the performance, operation procedures and lab conditions, especially room temperature, air humidity, incubator temperature should be strictly controlled. It is also strongly suggested that the whole assay is performed by the same operator from the beginning to the end.

ADDITIONAL INFORMATION

Related Product Information for VB6 elisa kit	Intended Uses: The kit is a competitive inhibition enzyme immunoassay technique for the in vitro quantitative measurement of VB6 in serum, plasma and other biological fluids. Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. A monoclonal antibody specific to VB6 has been pre-coated onto a microplate. A competitive inhibition reaction is launched between biotin labeled VB6 and unlabeled VB6 (Standards or samples) with the pre-coated antibody specific to VB6. After incubation the unbound conjugate is washed off. Next, avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. The amount of bound HRP conjugate is reverse proportional to the concentration of VB6 in the sample. After addition of the substrate solution, the intensity of color developed is reverse proportional to the concentration of VB6 in the sample.

NCBI AND UNIPROT INFORMATION

NCBI GI #	1179902462
Molecular Weight	34,859 Da
NCBI Official Full Name	vitamin b6
UniProt Protein Name	Vitamin b6

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
